## Press Release

### **Safety Power Inc. signs agreement with Critical Power Group as exclusive Manufacturer's Representative**

#### **Expanding sales and marketing coverage in key markets for increased demand in the U.S.**

**Summit, New Jersey, March 31, 2015** – Safety Power Inc. announced today that it has signed an exclusive agreement with the Critical Power Group (CPG) based in Ashburn, Virginia as their manufacturers' representative for the States of Virginia, Maryland, Delaware, West Virginia, and the District of Columbia. This new agreement will provide Safety Power the additional sales and marketing coverage in the mission critical capital and help with significant sales growth in the USA.

#### **About Safety Power Inc. (SPI)**

Safety Power is the leading manufacturer of emissions control systems for large diesel and natural gas engines. The technologies include Selective Catalytic Reduction (SCR) systems, oxidation catalyst, diesel particulate filters and silencing that can all be integrated into one cube shape named the [ecoCUBE®](#) product line. The [ecoCUBE®](#) product line has been successfully deployed in mission critical applications such as data centers, hospitals, banks, and municipal utilities applications. In addition to these areas, Safety Power markets to power generation (stand-by, demand-response, peak-shaving), combined heat and power (CHP), marine and industrial applications. Safety Power Inc. has offices in the USA and Canada. The headquarters is in Mississauga, Ontario.

#### **About Critical Power Group (CPG)**

**Critical Power Group** (CPG) is a woman owned small business that specializes in providing Design, Consultation, and Construction of Mission Critical Facilities. A strong emphasis on Green Solutions, Efficient Products and the Latest Technologies gives CPG an arsenal of Knowledge and Capabilities. Everything from power and environmental products, facilities integration, facility management & maintenance, O&M services, installation and monitoring services as well as Project Management are our Hallmarks.

CPG provides an integrated approach to its customers, where we function as a single source for all bid packaging, performance management, operational issues and testing. This ensures that the customer receives timely and efficient build-outs that meet all customer requirements for the facilities. CPG also uses several national and internationally recognized vendors in order to provide the customer with the best solution for the end users unique facility requirements.

CPG provides a single point of contact for scheduling and management of preventive maintenance activities, facility wide maintenance contracts, and power quality audits, by coordinating with the appropriate vendors and by developing customer specific maintenance programs. CPG provides site-commissioning services in order to assure that the end users systems are planned, designed, installed and tested for specification conformity and operational stability.

CPG is uniquely positioned to provide the following customized and seamless solution to any customer: A full range of equipment provisioning services including but not limited to, Uninterruptible Power Systems (1 and 3 phase), Continuous Power Supply (CPS), Ride Through systems at low and medium voltages, Rotary UPS, Power Distribution Units (PDU's), Remote Power Panels (RPP's), Voltage Regulators, Digital Static Transfer Switches (STS), Transient Voltage Surge Suppressors (TVSS & , Remote Monitoring Systems, Battery Plants (wet & dry), Backup Generators, Rectifier & Inverter Systems, Energy efficient/harmonic mitigation transformers, Computer Room Air Conditioning and IT Racks and in row cooling units.

CPG is a dominant provider of Data Center Design and Mission Critical Facilities support equipment. CPG will always remember that our end users and strategic manufacturer relationships ultimately determine our success.
